A. memory
B. intelligence
C. social cognition
D. biological cognition

Ans. C= social cognition

Solution: Please go through lecture notes of week-3 (slide no.08) for better understanding.

5)

The Information Processing View of Learning assumes that there are limits to how much information can be processed at each stage.

A. True
B. False

Ans. A= True

Solution: Please go through lecture notes of week-3 (slide no.09) for better understanding.

6) The Information Processing View of Learning assumes that information process is involved in ___

A. forgetting
B. remembering
C. perceiving
D. All of the given

Ans. D= All of the given

Solution: Please go through lecture notes of week-3 (slide no.09) for better understanding.

7) The capacity of the sensory register is ___.

A. very small
B. very large
C. 7+/-2 chunks
D. unlimited

Ans. B= very large

Solution: Please go through lecture notes of week-3 (slide no.14) for better understanding.

8)

Most children do not begin to engage in the process of rehearsal on their own until about age ___.

A. seven
B. two
C. thirteen
D. one

Ans. A= seven

Solution: Please go through lecture notes of week-3 (slide no.16) for better understanding.

9)
___ provides an interface between the sub-systems of working memory and the part of long term memory specialized for episodic memory.

A. Phonological loop
B. Visuo-spatial sketchpad
C. Retrieval buffer
D. Episodic buffer

Ans. D= Episodic buffer

Solution: Please go through lecture notes of week-3 (slide no.27) for better understanding.
