Week 10 : Assignment 10

The due date for submitting this assignment has passed.

Due on 2024-10-(

As per our records you have not submitted this assignment.

1) Which of the following are challenges faced by AI in the current era? (Select all that apply)

- [ ] AI systems being biased
- [ ] AI models requiring zero human intervention
- [ ] AI systems being completely unbiased
- [ ] AI models being trained on harmful data
- [ ] AI systems always making ethical decisions
- [ ] AI systems using transformer models

No, the answer is incorrect.
Score: 0

Accepted Answers:
AI systems being biased
AI models being trained on harmful data

2) What does the abbreviation "AGI" stand for?

- ( ) Artificial General Intelligence
- ( ) Automated Guided Interface
- ( ) Artificial General Information
- ( ) Artificial Geospatial Intelligence

No, the answer is incorrect.
Score: 0

Accepted Answers:
Artificial General Intelligence

3) Which of the following best describes one of the possible definitions of AGI?

- ( ) AI systems that are limited to specific tasks
- ( ) AI models trained for basic automation
- ( ) AI systems surpassing human intelligence
- ( ) AI systems which show high training accuracy

No, the answer is incorrect.
Score: 0

Accepted Answers:
AI systems surpassing human intelligence

4) Which of the following are potential challenges associated with AGI? (Select all that apply)

- [ ] Chaotic power struggles
- [ ] Utilization for selfish and short-term objectives
- [ ] Guaranteed long-term global stability
- [ ] Universal agreement on AGI's ethical use
- [ ] Potential misuse by a few for personal gain
- [ ] Non-existential risks

No, the answer is incorrect.
Score: 0

Accepted Answers:
Chaotic power struggles
Utilization for selfish and short-term objectives
Potential misuse by a few for personal gain

5) What is considered the ideal way to balance the development of AI models?

- ( ) Ensuring a safety-performance trade-off
- ( ) Maximizing performance without considering safety
- ( ) Focusing solely on safety at the expense of performance
- ( ) Ignoring both safety and performance to expedite development

No, the answer is incorrect.
Score: 0

Accepted Answers:
Ensuring a safety-performance trade-off

6) What should governments primarily focus on concerning AI systems at present?

- How to eliminate AI research entirely
- How to encourage unrestricted AI development without regulations
- How to ignore AI advancements altogether
- How to govern these AI systems and make them safe

No, the answer is incorrect.
Score: 0

Accepted Answers:
How to govern these AI systems and make them safe

7) What are the primary focuses of the EU AI Act? (Select all that apply)

- [ ] Regulating the use of AI to ensure safety, transparency, and accountability
- [ ] Banning all forms of AI development in Europe
- [ ] Promoting the unregulated use of AI across all sectors
- [ ] Requiring all AI systems to be open-source and publicly accessible
- [ ] Banning systems with cognitive behavioral manipulation of people or specific vulnerable groups

No, the answer is incorrect.
Score: 0

Accepted Answers:
Regulating the use of AI to ensure safety, transparency, and accountability
Banning systems with cognitive behavioral manipulation of people or specific vulnerable groups

8) What does the abbreviation "GDPR" stand for?

- Global Data Privacy Regulation
- General Data Protection Rule
- General Data Protection Regulation
- Global Data Protection Requirement

No, the answer is incorrect.
Score: 0

Accepted Answers:
General Data Protection Regulation

9) Which of the following is a way to protect personal data?

- Giving people more power over their data
- Allowing unrestricted access to personal data
- Reducing transparency in data usage
- Increasing the collection of personal data without consent

No, the answer is incorrect.
Score: 0

Accepted Answers:
Giving people more power over their data

10) What is one challenge even after training a model on unbiased data?

- Implicit bias may still exist in the model
- No challenge, model will be completely free of any bias
- The model will exhibit perfect performance in all scenarios
- The model will have issues related to data processing

No, the answer is incorrect.
Score: 0

Accepted Answers:
Implicit bias may still exist in the model

11) Among the following, which type of biased system is considered particularly harmful?

- Decision systems
- Recommendation systems
- Entertainment systems
- Weather forecasting systems

No, the answer is incorrect.
Score: 0

Accepted Answers:
Decision systems
